ESSENTIAL QUESTION How can polynomial identities and the Binomial Theorem be used to expand and simplify expressions?

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

Use at least 3 of the following terms in your response.

Sentence Starters

- The Binomial Theorem states that...
- When expanding $(a + b)^n$, the coefficients can be found by...
- Pascal's Triangle is useful because...
- A polynomial identity is...

WRITE Rubric – Topic 3, Lesson 3

5 points	3 points	1 point	Score
W – Write in complete sentences			
Correctly uses English conventions (capital letters, punctuation, etc.) to write clear, complete sentences.	Some errors in English conventions.	Many errors in English conventions.	
R – Respond to the question			
Gives correct and logical responses to show understanding, including justifying the response.	Gives partially correct response that shows some understanding. Justification is lacking.	Gives a mostly incorrect response that shows a need for improvement.	
I – Include math vocabulary			
Often and correctly uses math vocabulary with accuracy and precision.	Some math vocabulary used.	Little to no math vocabulary and/or used incorrectly.
